

The initial UI of the task time tracker.

When the user click on the add task button ,user will be able to view a project details form

Fistly user has to enter the new project name and then click on the add project button, latter user has to select the project from the dropdown in the project. Then enter the task name and click on add task button.

Task	Project	Status	Duration	Date	Action
taking test 1	test 1	Progress	00:00:00	2022-09-14 20:54:04	<input type="text" value="Change status"/>

All Tasks

Now user can see the task is added to the list with the details they have entered. Also then can check the change status drop down where they can find different status of their project.

20:55 14-09-2022

Various change status are start, mark as completed , deleted.

When start is clicked the timer starts running ,Mark as completed will stop the project and shows both start and end times of the task.Delete will delete the task from the list

For every change status will get an alert to confirm their action and here the alerts are generated using sweetalert.

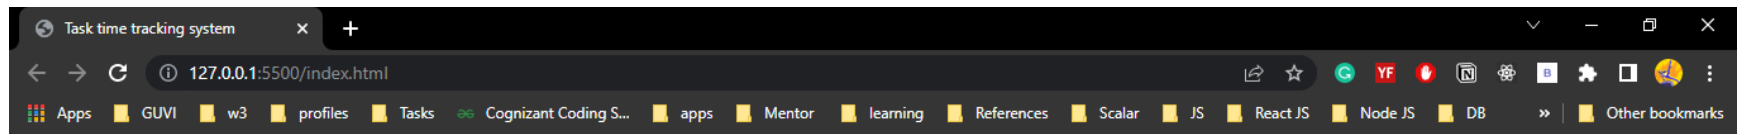

Task	Project	Status	Duration	Date	Action
taking test 1	test 1	Started	00:00:17	2022-09-14 20:54:04	Change status
taking test 2	test 2	Completed	00:00:00	2022-09-14 20:54:32 to 2022-09-14 20:55:37	Change status
taking test 3	test 3	Progress	00:00:00	2022-09-14 20:54:53	Change status

All Tasks
